V.	Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1. statement

Statement .			
Novelty (N)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please Sec supplemental sheet)	NO
Inventive Step (IS)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please See supplemental sheet)	NO NO
		(D) (C) 1 (1) 3	Y FIND
Industrial Applicability (IA)	Claims	(Please See supplemental sheet)	YES
	Claims	(Please See supplemental sheet)	NO NO

2. citations and explanations

Claims 1-3, 5, 6, 5-13, 22-24, 26, 27, 29-34, 43, 45-49, 51, 53 and 54 lack novelty under PCT Article 33(2) as being anticipated by Huffman (WO 97/22112).

Considering claims 1, 8, 11, 22, 29, 32, 43 and 51, Huffman discloses an apparatus and corresponding method for providing text to speech conversion for an electronic book displayed on a viewer comprising:

- a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7),
- b) a selection module (242, figure 12) that receives a selection of text on the displayed page for conversion to speech (page 19, lines 16-23);
- c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text in to corresponding speech (page 12, lines 3-14) (see also figures 11, 14 and 15).

Claims 2-3, 9-10, 12-13, 23-24, 30-31, 33-34 and 46-46 are met by figure 11 and columns 18-19.

Claims 5, 26 and 49 are met by page 20, lines 6-24.

Claims 6, 27 and 58-54 are met by page 12, lines 3-18.

Claims 47-48 are met by figures 5,6,11,15, 16 or 21.

Claims 7 and 28 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Case (5,737,725).

Considering claims 7 and 28, Huffman (97/22112) discloses an apparatus and corresponding method for providing text to speech conversion for an electronic book displayed on a viewer comprising:

- a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7);
- b) a selection module (242, figure 12) that receives a selection of text on the displayed page for the conversion to speech (page 19, lines 16-23);
- c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text in to corresponding speech (page 12, lines 8-14) (see also figures 11, 14 and 15).

However, Huffman (97/22112) fails to specifically disclose (Continued on Supplemental Sheet.)

WRITTEN OPINION

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: Boxes I - VIII

Sheet 10

TIME LIMIT:

The time limit set for response to a Written Opinion may not be extended. 37 CFR 1.484(d). Any response received after the expiration of the time limit set in the Written Opinion will not be considered in preparing the International Preliminary Examination Report.

V. 1. REASONED STATEMENTS:

The opinion as to Novelty was positive (YES) with respect to claims 4.7,14-21.25,28,35-42.44,50,52.55-58.

The opinion as to Novelty was negative (NO) with respect to claims 1-3.5,6,8-13,22-24.26,27.29-34,43,45-49.51,53,54.

The opinion as to Inventive Step was positive (YES) with respect to claims NONE.

The opinion as to Inventive Step was negative (NO) with respect to claims 1-58.

The opinion as to Industrial Applicability was positive (YES) with respect to claims 1-58.

The opinion as to Industrial Applicability was negative (NO) with respect to claims NONE.

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

an audio access module that accesses an audio file as recited in the claims.

Case discloses an audio access module that accesses an audio file for the advantage of automatically generating audio or speech corresponding to text.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22112) system to include an audio access module that accesses an audio file, as taught by Case, for the advantage of automatically generating audio or speech corresponding to text.

Claims 4, 25, 44 and 52 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Boulton (4985697).

Considering claims 25, 44 and 52, Huffman (97/22112) fails to specifically disclose permitting a user to request a definition of a word as recited in the claims.

Boulton discloses permitting a user to request a definition of a word for the advantage of providing a dictionary function to a user. See column 4, lines 11-16, the abstract and figures 1 and 16.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22112) system to include permitting a user to request a definition of a word, as taught by Boulton, for the advantage of providing a dictionary f unction to a user.

Claims 14-17, 35-38 and 50 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Van Kleeck et al (Van Kleeck, 5,890.122).

Considering claims 14-17, 35-38 and 50, Huffman discloses an apparatus and corresponding method for receiving commands for executing functions to an electronic book displayed on a viewer comprising:

a) a display (130) that displays a page of an electronic book on a viewer (figure 3), the page including text (figure 7); b) a selection module (242, figure 12) that receives a selection of text on the displayed page for the conversion to speech (page 19, lines 16-23); and c) a conversion module (152, figure 3 or 42) that converts at least a portion of the selected text in to corresponding speech (page 12, lines 3-14) (see also figures 11, 14 and 15).

However, Huffman fails to specifically disclose a receive module that receives an audible command, a conversion module that converts the audible command into a corresponding electronic signal and an execute module as recited in the claims.

Van Kleeck discloses an apparatus for receiving commands for executing functions comprising:(a) receive module (506,507) that receives an audible command (b) a conversion module (509) that converts the audible command into a corresponding electronic signal and (c) an execute module (510,511) that executes a function for the advantage of providing voice control of an electronic apparatus (instead of manual key input commands).

It would have been obvious to one of ordinary skill in the art to modify Huffman's system to include a receive module that receives an audible command, a conversion module that converts the audible command into a corresponding electronic signal and an execute module, as taught by Van Kleeck, for the advantage of providing voice control of an electronic apparatus instead of manual key input commands.

Claims 18-19, 39-40 and 55-58 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22112) in view of Vergo (EP 0 924,687 A2).

Considering claims 18-19, 39-40 and 55-58, Huffman discloses an apparatus and corresponding method for providing an electronic book displayed on a viewer comprising a display (130) that displays a page of an electronic book on a viewer

WRITTEN OPINION

International application No

PCT/US00/17966

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: Boxes I - VIII

Sheet 11

(figure 3), the page including text (figure 7).

However, Huffman fails to specifically disclose a receive module that receives speech from a user, a commands module the converts the speech into corresponding electronic text and an insertion module that inserts the text into the electronic book as recited in the claims.

Vergo discloses an apparatus for performing dictation into an electronic book displayed on a viewer comprising a receive module that receives speech from a user, a commands module the converts the speech into corresponding electronic text and an insertion module that inserts the text into a device. This system provides efficient transcription from voice to text into an electronic device. See abstract and figure 3.

It would have been obvious to one of ordinary skill in the art to modify Huffman's system to include a receive module that receives speech from a user, a commands module the converts the speech into corresponding electronic text and an insertion module that inserts the text into the electronic book, as taught by Vergo, for the advantage of providing efficient transcription from voice to text into an electronic device.

Claims 20-21 and 41-42 lack an inventive step under PCT Article 33(3) as being obvious over Huffman (WO 97/22110) in view of Juang (EP 0 892,388 A1).

Considering claims 20-21 and 41-42, Huffman (97/22110) discloses an apparatus for restricting access to an electronic book for display on a viewer comprising: a store module (136, 154) that stores an electronic book for display on a viewer (figure 3).

However, Huffman (97/2110) fails to specifically disclose a receive module that receives audible command, a conversion module and an authorization module as recited in the claims.

Juang discloses a receive module that receives an audible command from a user, a conversion module that converts the audible command and an authorization module the provides authorization for the advantage of restricting access to an electronic device. See the abstract, figures 1-2 and page 2, lines 16-19.

It would have been obvious to one of ordinary skill in the art to modify Huffman's (97/22110) system to include a receive module that receives audible command, a conversion module and an authorization module, as taught by Juang, for the advantage of restricting access to an electronic device.
